

FlexiVan's New Traffic Toll Program

Effective March 9, 2017

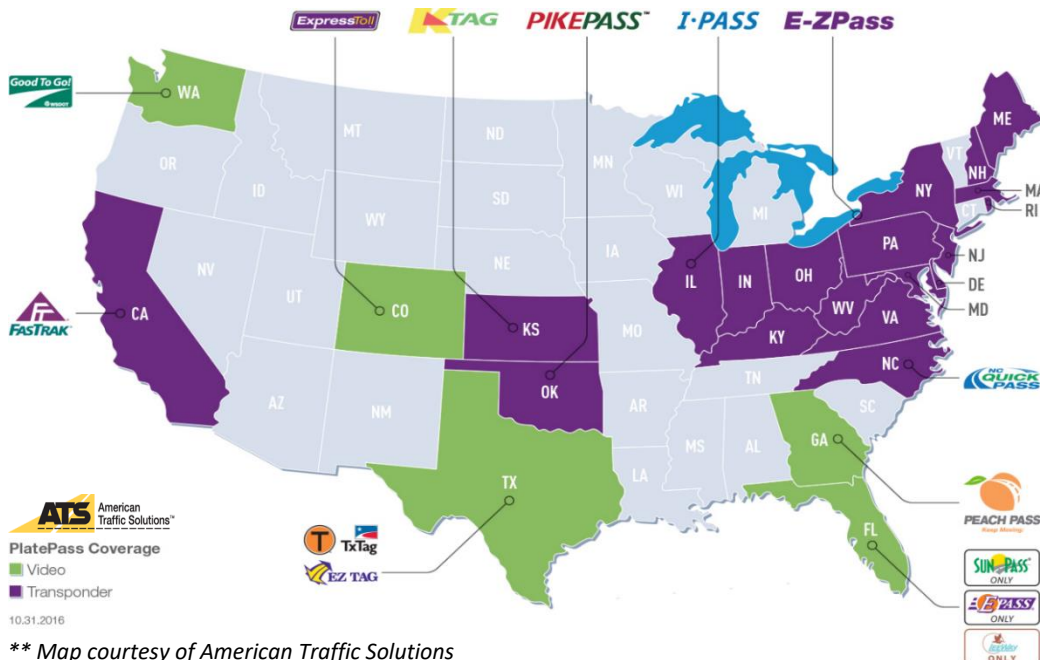

How is FlexiVan helping you to avoid excessive unpaid toll penalties? ...By managing unpaid tolls on behalf of motor carrier customers. It's a solution that benefits everyone!

Instead of motor carriers having to account for unpaid tolls and fines adding-up, our new traffic toll program offers immediate back-up toll coverage for our motor carrier customers.

Oftentimes, toll gates don't pick-up motor carrier transponder information due to malfunction, non-existence or expired accounts. Fines can become excessive. Now, any unpaid tolls will automatically be paid by FlexiVan and re-billed to the appropriate customer on a weekly basis. Motor carriers not only can avoid all toll penalties this way, but also any additional toll authority fees.

FlexiVan has teamed up with American Traffic Solutions (ATS) on this program, who works with a wide network of toll authorities throughout the United States (see map below). If a FlexiVan chassis passes through these electronic toll gates and a toll is not paid:

1. ATS automatically charges the toll to FlexiVan's ATS account, registering chassis plate number, as well as date and time;
2. FlexiVan pays the toll amount immediately (on behalf of the motor carrier);
3. FlexiVan re-bills the appropriate motor carrier the toll amount, plus a **\$20 administrative fee.**

We're sure you'll be pleased with how our new program can help you to avoid excessive toll fees. If you have questions, please contact your local FlexiVan sales representative or email: TollManagement@FlexiVan.com.
